

Dear Hiring Manager,

I am writing to express my interest in your current opening for a Full-Stack Web Developer. I believe that my strong technical experiences and education background will make me a very competitive candidate for this position.

As a full-stack web developer in MediaTek Inc., a top five IC design company worldwide, I was responsible for developing APIs for web, mobile, and wearable devices. In backend, I successfully developed a mutual authentication API backend for all of our different services. In frontend, I bootstrapped an email template engine which uses React.js to render SVG charts and HTML email contents. As a result, I was awarded 2016 MediaTek vAward.

My passion in start-up companies was inspired by my position at Inbound Tech. I had the privilege to create a questionnaire system and introduce CI/CD automations. As a consultant, I managed a team of developers and designed the architect for the integration of original Wordpress blog and newly developed and undeveloped features.

I've attached my resume detailing my experience, along with a link to my website. I would appreciate it very much if you may offer me a chance of an interview where I could further demonstrate my skills for the position. I believe engineers are those who can make a difference, and I'm eager to be part of the team.

Thank you for your time and consideration.

Sincerely,
Tai-Yu Chen
